Seals to your heart

**Sealing Solutions for
Pneumatic Automation**

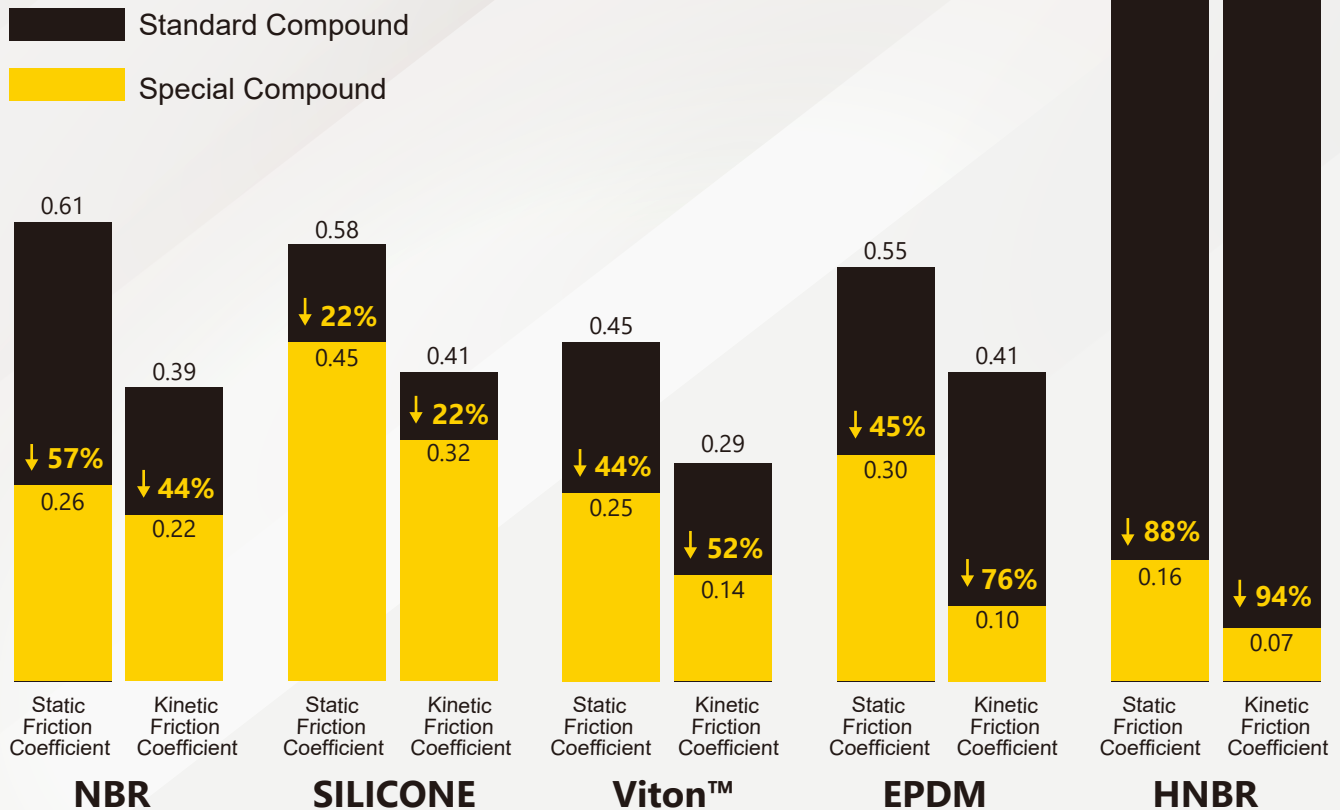

Low Friction Pneumatic Solutions

Low friction seals play an important role in pneumatic applications for the optimization of performance and reduction of excessive wear and tear.

In meeting with this requirement, GMORS has developed a series of special internally lubricated compounds.

Based on our test results comparing our standard compounds to these special internally lubricated compounds, the frictional force for rubber-metal contacts for the same application has been significantly reduced.

SOLENOID VALVE Sealing Solutions

Easy to Install & Smooth in Movement

Lowest Friction and Self-lubricant

Customized Valve Seals / Gasket

O-Rings

GMORS PV Series

GAS SPRINGS Sealing Solutions

Durable, Compact, Smooth and Low Loss

Low Friction and Long Life

Metal-Bonded U-Cup Seals

PTFE Guide Rings

O-Rings

Customized U-Cup Seals

PRESSURE REGULATOR Sealing Solutions

Excellent Long Term Sealing to Prevent Dust and Leakage

Stable Fluid Control and Low Compression Set

ED Rings (DIN 3869)

O-Rings &
PTFE Back-up Rings

Customized Washers

GRIPPER Sealing Solutions

10 Million Lifetime Testing

Lowest Friction and High Frequency

U-cup Seals

O-Rings

Customized Washers

AIR SOURCE UNITS Sealing Solutions

Extraordinary Sealing Function

Precise Design and Excellent Flexibility

U-cup Seals

O-Rings

Customized Diaphragms

LINEAR WAY Sealing Solution

Speedy Movement with Minor Noise

Low Friction with the Lowest Vibration Noise
